### RPIA

RPIA is a global fixed income asset management firm specializing in corporate bonds and active interest rate management. Founded in 2009 by a group of senior executives from RBC, the firm has grown to \$5 billion in assets under management and 58 employees. The cornerstone of RPIA's investment philosophy is the view that credit is an inefficient asset class and we seek to add value through credit research, active trading and interest rate management. Our investment process is designed to generate best in class risk-adjusted returns regardless of overall market direction. RPIA partners and employees are significant investors in our funds to ensure alignment with our clients.

### STRATEGY OVERVIEW

RP Select Opportunities ("SOF") is an unconstrained long/short credit strategy that seeks to generate strong risk-adjusted returns by investing in opportunities across credit asset classes including investment grade, high yield, preferred shares and SPACs. The strategy utilizes outright and relative value, alongside active trading, to seek absolute returns in all interest rate and credit spread environments. The strategy aims to produce a return profile with low volatility and preserve capital in down markets.

**COMMENTARY - MAY 2019**

- Positive performance from credit markets took a pause this month as the market digested increased trade tensions with BBB and BB rated credit showing some weakness.
- Interest rates in Canada and the U.S. moved lower as recession fears climbed.
- The strategy produced positive returns through energy-related shorts and select financials such a U.S. regional bank and financial services firm. Market hedges also helped to protect capital.
- As credit spreads widened, we had to adjust the valuations on a number of positions we own in the portfolio. We view this re-pricing as short-term in nature and remain confident in a number of our high conviction positions.

**IMPORTANT INFORMATION**

\*The performance comparisons presented are intended to illustrate the historical performance of the strategy compared a specified market index since strategy inception. The comparison is for illustrative purposes only and does not imply future performance. There are various differences between an index and the investment strategy that could affect the performance and risk characteristics of each. Market indices are not directly investable and index performance does not account for fees, expense and taxes that might be applicable to an investment strategy.

The information presented herein is for informational purposes only. It does not provide financial, legal, accounting, tax, investment or other advice, and should not be acted or relied upon in that regard without seeking the appropriate professional advice. The information is drawn from sources believed to be reliable, but the accuracy or completeness of the information is not guaranteed, nor in providing it does RP Investment Advisors LP ("RPIA") assume any responsibility or liability whatsoever. The information provided may be subject to change and RPIA does not undertake any obligation to communicate revisions or updates to the information presented. Unless otherwise stated, the source for all data cited is RPIA. This document does not form the basis of any offer or solicitation for the purchase or sale of securities. Products and services of RPIA are only available in jurisdictions where they may be lawfully offered and to investors who qualify under applicable securities regulation. In Canada, RP Select Opportunities Fund is offered to qualified investors pursuant to applicable prospectus exemptions. Forward looking statements are based on current RPIA views and assumptions. Economic and market conditions can change which may materially impact actual future events and as a result RPIA's view and course of action.

Performance is not guaranteed and past performance may not be repeated. Unless specified otherwise, performance data presented herein reflects stated strategy returns in Canadian dollars and is net of all fees and expenses. Actual returns may vary from one investor to the next in accordance with the terms of the governing documents of relevant entities. RP Select Opportunities strategy returns are based on the weighted-average composite return of a separately managed account utilizing a similar strategy from inception in April 2014 to June 2014, and then linked to the returns of RP Select Opportunities Fund Class A Lead thereafter. Unless specified otherwise, returns for time periods of more than one year are historical annual compounded total returns while returns for time periods of one year or less are cumulative figures and are not annualized. "Target Return" represents RPIA's annualized investment return objective for the stated strategy, does not imply actual future performance and may be revised at the discretion of RPIA, and without prior notice. "INDEX" represents the Barclays US Corporate High Yield Index USD (Source: Barclays Live).

Portfolio characteristics are presented in CAD market value as a percentage of NAV. "Modified Duration" measures the approximate percentage change in value in response to a 1% change in interest rates. "CS01" is defined as the change in present value for a one basis point parallel shift in the underlying credit spread curve. "Volatility" is represented by the annualized standard deviation of returns since inception. "Months Positive" refers to the percentage of positive performing months since strategy inception. "Sharpe Ratio" is calculated using the CAD risk free rate represented by the SCM CDN Money Market Indices 91-day T-Bill (source: PC-Bond) and the USD risk free rate represented by Merrill Lynch 3-month T-bill (Source: Bloomberg). "Drawdown" represents the percentage loss suffered by the strategy from peak to trough. "Geographic Allocation", "Sector Breakdown" and "Rating Allocation" excludes Cash, Cash Equivalents and Government Bonds. Geographic Allocation is calculated using "Country of Risk" as defined by Bloomberg LP.
