FIRM OVERVIEW

RPIA is a global fixed income asset management firm specializing in corporate bonds and active interest rate management. Founded in 2009 by a group of senior executives from RBC, the firm has grown to over \$5 billion in assets under management and 61 employees. The cornerstone of RPIA's investment philosophy is the view that credit is an inefficient asset class and we seek to add value through credit research, active trading and interest rate management. Our investment process is designed to generate best in class risk-adjusted returns regardless of overall market direction. RPIA partners and employees are significant investors in our funds to ensure alignment with our clients.

STRATEGY OVERVIEW

- Focus on capital preservation. This fund was created for investors seeking a credit solution with the potential to produce better total returns than government securities alone while prioritizing capital preservation.
- Global diversification. The fund invests in the corporate debt of developed nations providing broad portfolio diversification and a lower correlation to Canadian assets.
- Added value from active management. RPIA employs rigorous bottom up research and relative value monitoring to extract value from inefficiencies in the global bond market aiming to produce superior returns with less risk.

COMMENTARY - JULY 2019

- During the month of July, Central Banks played the main protagonist in the market with the Federal Reserve cutting interest rates for the first time in 11 years and the European Central Bank (ECB) giving strong hints that further easing is on the way.
- Credit spreads tightened generally across markets thanks to (1) Lower global yields pushing global fixed income investors into corporate bonds, (2) a dovish shift from ECB and (3) strong U.S. economic growth, which exceeded expectations in Q2.
- The fund continued to benefit from its geographic flexibility. Top performers included long-term conviction issuers across Europe and the U.S.
- Top contributors to performance also included positions in financial sector floating rate notes and preferred share positions.
- Looking forward, the fund has modestly reduced our exposures in both U.S. and Canadian credit while redeploying proceeds in a more defensive positioning while also buying, at the margin, select European issuers where we see some attractive opportunity.

IMPORTANT INFORMATION

*MER previously stated as 1.15% (Class F) which excluded applicable HST and manager rebates.

For purchases made through the offering memorandum, the initial investment minimum is \$250,000 and \$25,000 for subsequent investments.

Performance presented is for Class F of the Fund, which does not include embedded sales commissions. Returns of Fund classes may differ due to differences in fees and expenses. Refer to the Fund Facts document for each class for more information. Effective June 21, 2019, the Management Fee of Class F and A of the fund was reduced which in turn affected the fund's performance.

Economic and market conditions can change which may materially impact actual future events and as a result RPIA's view and course of action.

Always consult with your registered investment dealer before investing in mutual funds. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. Indicated rates of return include changes in unit value and reinvestment of all dividends or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Returns for time periods of more than one year are historical annual compounded total returns while returns for time periods of one year or less are cumulative figures and are not annualized. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated. The compound growth chart is used only to illustrate the effects of a compound growth rate and is not intended to reflect future values or returns of the Fund. The payment of distributions is not guaranteed, may fluctuate and does not infer performance, rate of return, or internal yield of the Fund.

"Modified Duration" measures the approximate percentage change in value in response to a 1% change in interest rates. "Yield to Maturity" of the fund represents the aggregate yield of all portfolio securities, less the directly observable yield on applicable derivative instruments held in the portfolio, or in the case of futures, the relevant yield on the "cheapest to deliver" plus the "implied repo rate". "Volatility" is represented by the annualized standard deviation of returns since fund inception. "Sharpe Ratio" is a widely used measure that is meant to illustrate the return realized by an investment relative its volatility (risk). "Sharpe Ratio" is calculated using the CAD risk free rate represented by SCM CDN Money Market Indices 91-day T- Bill (Source: FTSE Russell). "Top 5 Long Issuer Holdings" excludes Cash & Cash Equivalents, Federal Government Bonds and Banker's Acceptances. "Geographic Allocation" is calculated using "Country of Risk" as defined by Bloomberg LP.
